

ARABIA

Turf Type Tall Fescue

SPECIAL FEATURES

Arabia

Arabia's density, disease resistance, and durability make it a perfect choice for home lawns, sports fields, parks, and golf course roughs.

- Selected for its top net blotch resistance
- Very rich dark green color
- Endophyte enhanced
- Performed especially well in our transition zone trials

AGRONOMIC CHARACTERISTICS

- Good cool-weather color retention and early spring color
- Performs well in full sun or moderate shade
- Good to excellent rate of establishment
- Excellent tolerance to disease and insect pressure
- Excellent seedling vigor
- Excellent fall color

DISEASE TOLERANCE

- Excellent net blotch resistance
- Excellent brown patch resistance
- Good resistance to pink snow mold
- Good resistance to stem rust

SUGGESTED SEEDING RATES

6-12 lbs. per 1,000 sq. ft. (260-520 lbs. per acre)
